

Kirana Basavaraj Hallur

An enterprise-level software engineer role is my objective, where my expertise in designing, planning, and maintaining software programs can be put to excellent use. My ambition is to work alongside a diverse team that shares a common goal of contributing to the company's vision and achieving its objectives.

PROJECTS

Medicine Delivery System (2019)

- I have successfully completed a web application project focused on the 'Medicine Delivery System.' The project comprises four key modules: customer, retailer, wholesaler, and admin. Within this system, patients can conveniently upload prescriptions provided by their doctors.

Computing Service Provider with Technology (2023)

- The system enables global collaboration and intelligence gathering on technology integration, providing access to project statuses, technologies, and vendor support.
- The system supports utility use, data upload, administrative control, monitoring, secure access, and flexible scaling and risk planning.
- The system allows setting project conditions, selecting tasks, and benefits from virtual distribution and localized usage.

Feed back system (2023)

- It is a **live project**, that has been submitted to our college.
- The main intention of this project is to assist the faculties of our college in meeting NAAC criteria and maintaining student records.
